## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11 and 26-32, drawn to a process of forming virtual cutting edge on a carton blank, classified in class 225, subclass 1.
  - II. Claims 12-25 and 33-45, drawn to a carton blank, classified in class 225, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I-II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the carton blank can be made by another and materially different process such as bending instead of cutting.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is advised that there are two claims 44, filed on paper received on 11/13/01. The second claim 44 has been renumber to 45.
